PCN Type: Design change

Data Sheet Change: New datasheet for new orderable part numbers

Detail of Change:

This notice is to advise customers that IDT has made a minor circuit change to optimize VCO band at Power on due to the power-on reset circuit that is used does not delay the beginning of the calibration routine. As a result, the calibration algorithm begins before the internal regulators and/or VCO is settled, and can result in an inaccurate calibration result.

There is no change to the die/package technology or manufacturing.

The orderable part numbers will be changed. IDT request customers to switch to the new part numbers at the earliest convenient.
